networthy SYSTEMS

SERVICE BRIEF

Comprehensive Spam Protection

Prevent emails infected with viruses, malware, and other potential threats from entering your company's network infrastructure and Eliminate the Loss of Productivity that comes with it.

How Much Does Spam Cost Your Company Annually?

The numbers are actually quite staggering… and crippling.

Would you believe us if we told you that your business is losing up to $712 per employee every year due to spam and junkmail? Well, believe it. In fact, up to 78 percent of all email your business receives can be considered spam. If you multiply $712 by the number of employees you have, you'll quickly realize that handling this continuous stream of spam and junkmail is clogging your inbox and Exchange servers, effectively crushing your budget and limiting your potential as an organization.

More Spam Means More IT Issues

Spam isn't just a time-waster.

Spam is known for being a massive time-waster for businesses, but the real threat is much more terrifying. Spam often comes attached with harmful viruses and malware, which are one of the root causes of your daily IT issues.

Networthy Systems's comprehensive spam protection solution is a cost-effective way to handle this everyday threat. By taking advantage of a powerful hosted solution, you can minimize spam without installing new hardware or software. Using intelligent pre-designed filters, malicious emails are prevented from reaching your network in the first place. If a message is somewhat questionable, it's quarantined and presented to you in a daily report. This way, you'll be sure to never miss an important email due to your spam filter. In fact, our spam protection is so comprehensive that you'll *immediately* notice the benefits the moment it's activated.

"Don't just mark junk mail; prevent it."

Stop Spam in its Tracks

Protect your inbox from any and all spam messages.

Networthy Systems's spam protection essentially acts as a firewall for your business's email solution, effectively eliminating spam before it has the chance to make it to your inbox. Our solution protects you from several email-based threats, including: viruses, phishing attacks, Denial of Service (DoS), Directory Harvest Attacks (DHA), and more.

Take Back Your Workday

Productivity and your business, reunited.

Nothing is more valuable to your business than your time. Imagine how much more productive your team can be if users don't need to worry about spam or junkmail every morning. More than anything else, our spam protection solution is designed to help you keep your business's intellectual property safe, and help you get the most from your technology. Don't let spam hold your workday hostage any longer.
